Logs

Application logs are kept for 45 days and then deleted. Security audit logs are kept for 400 days. Debug logs are kept for 3 days only and may not contain customer data. Log deletion is automatic and runs every night at 02:00.

Backups

Database backups are taken every 6 hours and kept for 35 days. A restore test is done on the last Friday of every month. Backups are encrypted and stored in a second region. The retention review reference is CANARY-ENG-f0f5c86f.
